General Assembly, Remote

Certificate | Cloud Computing
AWS Cloud Practitioner, Remote

Pursuing Degree | Computer Science
Georgia State University, Atlanta, GA

PROJECTS

React-Air-Quality (Individual)

- Used React/Javascript/CSS-grid to create front-end layout
- Retrieved information from API server about air quality to display info on page while utilizing NPM packages
- Used Git throughout the process for version control; tested features before implementing

JJ Shoes (Collaborative)

- Used React/CSS & CSS-Grid/React-Router/Bootstrap to create front-end layout
- Full CRUD functionality using Django Rest Framework, Python, & Postgres for backend information

Boat (Collaborative)

- Used React/React Styled Components/React-Router to create front-end layout
- Full CRUD functionality using Javascript/Node.js/Express frameworks; data stored using MongoDB database through Mongoose Applied
- Git throughout the process for version control and tested features

Hack-Week-Libraries (Collaborative)

- Had a week to try out new technologies and chose Angular
- Used CSS/HTML/TYPESCRIPT to display content on page
- Created Angular Library consisting of ecommerce layouts for watches and shoes
- Applied Git throughout the process for version control and tested features.

EXPERIENCE

September 2018 - Current
Clerk Quiktrip | Conyers, GA

- I deliver an exceptional customer experience. I greet customers, acknowledge and address their needs. Progressively learn additional skills to improve the overall store layout.
